

RADIOLOGICAL OPERATIONS SUPPORT SPECIALIST

RESOURCE CATEGORY	Screening, Search, and Detection
RESOURCE KIND	Personnel
OVERALL FUNCTION	<p>The Radiological Operations Support Specialist (ROSS):</p> <ol style="list-style-type: none">1. Provides subject-matter expertise and guidance on questions about radiation, the environment, hazard modeling, data and risk management, public protective actions and other scientific and technical issues to incident response leaders at any level2. Gathers, organizes, synthesizes, documents and distributes incident and resource information to improve situational awareness at all levels of incident management3. Is able to clearly explain the implications of modeling, measurement and analysis methods, as well as the health risks and hazards that exist during a radiological or nuclear incident4. May function as a ROSS Strike Team Leader when serving as a Type 1 or Type 2 ROSS as part of a ROSS Strike Team
COMPOSITION AND ORDERING SPECIFICATIONS	<ol style="list-style-type: none">1. This position can be ordered as a single resource.2. Requestor specifies any additional qualifications necessary based on incident complexity and needs3. Discuss logistics for deploying this position, such as working conditions, length of deployment, security, lodging, transportation, and meals, prior to deployment

Each type of resource builds on the qualifications of the type below it. For example, Type 1 qualifications include the qualifications in Type 2, plus an increase in capability. Type 1 is the highest qualification level.

DESCRIPTION	(Continued) f. Restoration of critical infrastructure g. Decontamination of people and places h. Radioactive waste management		(Continued) protection guidance and best practices, including how best to apply the Environmental Protection Agency (EPA) PAG Manual: Protective Action Guides and Planning Guidance for Radiological Incidents, the Department of Homeland Security (DHS) Radiological Dispersal Device (RDD) Response Guidance, FEMA Improvised Nuclear Device Response and Recovery guidance and other rad/nuc emergency response and recovery guidance b. The ability to obtain updated/additional radiological advice and recommendations from appropriate advisory organizations 8. Helps responding agencies and agency decision makers use the RadResponder website to maintain situational awareness of radiological aspects of the incident 9. Communicates radiological issues to nontechnical audiences and provides first responders with just-in-time training on the RadResponder mobile app and website, monitoring devices and safety protocols 10. Effectively integrates into the Incident Command System (ICS) structure	
EDUCATION	One of the following: 1. Graduate degree in a radiation-related field 2. Successful completion of part 1 of the American Academy of Health Physics (AAHP) certification exam 3. Equivalent experience, as the AHJ determines	One of the following: 1. Bachelor's degree in science, technology, engineering, mathematics or a radiation-related field, such as health physics, nuclear engineering or radiological science 2. National Registry of Radiation Protection Technologists (NRRPT) certification 3. Equivalent experience, as the AHJ determines	One of the following: 1. Associate's degree in a radiation-related field, such as health physics, nuclear engineering or radiological science 2. NRRPT certification	In lieu of an undergraduate degree, a NIMS Type 3 ROSS may substitute training and five years of experience as a National Fire Protection Association (NFPA) 472 Hazardous Materials Technician Specialist Employee A with a specialty in radioactive materials and/or weapons of mass destruction or equivalent, as the AHJ determines.
